**Demo Reel Breakdown**

<p><b>Sr. Visual Effect Artist</b> <b>Raytheon</b></p>	<p><b>Misc Projects, Products and Programs (2013-present)</b></p> <p>-Various aspects of each shot: Storyboarding, Modeling, Texturing, Animation, Lighting, Rendering, FX, Scripting/ Coding, Cut editing, and task management.</p> 
--	--

<p><b>Assoc. Lead Lighting TD</b></p> 	<p><b>Percy Jackson: Sea of Monsters (2013)</b></p> <ul style="list-style-type: none"><li>-Generated background ocean waves and rippled surfaces</li><li>-Tested and developed shaders for fx surfaces, points, and volumes to create ocean churn, foam, mist, and splashes</li><li>-Scripted expressions for water aeration on ocean shader</li><li>-Lit and rendered fx water elements and hippocampus character using Houdini's Mantra renderer</li><li>-Worked with lookdev dept to develop hippocampus character lookdev and 'wet look'</li><li>-Contributed in development of R+H's proprietary compositing package 'Crom' in the show's pipeline</li></ul>
---	---

### FX Lighting TD

### Life of Pi (2012)

- Generated by ocean waves and rippled surfaces in Houdini
- Developed wave movement to match foreground plate motion and some fx elements
- Tweaked water shader to match bg plate environment
- Lit and rendered fx water elements in Houdini's Mantra renderer
- Worked within a stereoscopic pipeline

### Lighting TD

### Alvin and the Chipmunks: Chipwrecked (2011)

- Setup lighting rig for chipmunks and clothing/props
- Developed shader lookdev for Simon's torn sweater seaweed bandana, gold crown, and Alvin's wet sweater
- Animated light rig intensities to match bg plate's lightning effect
- Lit and rendered all character fg elements with R+H proprietary renderer 'wren'

### Lighting TD

### Mr. Poppers Penguins (2011)

- Setup the character lighting rig and HDRI for the penguins
- Controlled contribution for character to character and track geometry to character shadows/global illumination
- Lit and rendered cg characters and reflections with R+H proprietary renderer 'wren'

### Lighting TD

### Hop (2011)

- Setup lighting rig and HDRI for the sleigh, “Chunny”, scepter, and *Massive* crowd chicks.
- Attached lights to scepter and sleigh to match animation
- Controlled track geo shadow contribution for track character to bunny and vice versa.
- Lit and rendered characters and reflections with R+H proprietary renderer ‘wren’
